Dometic®
Gravity-Discharge Toilets
INSTRUCTION MANUAL

IMPORTANT NOTICE
Dometic® toilet systems must be installed according to Dometic’s recommended procedures.

WARNING
This manual must be read and understood before adjustment, maintenance, or service is performed. Modification of this product can result in property damage.
Important Information Before Operation

1. Do not use chlorine or caustic chemicals, such as laundry bleach or drain-opening types, in the system. These products damage the seals in toilets and dump valves.
2. Do not permit foreign objects (paper towels, paper cups, diapers, sanitary napkins, etc.) to be flushed through the toilet.
3. Mechanical seal toilets, like Dometic units, are designed to only discharge directly into a holding tank. Horizontal pipe runs as found in conventional residential or commercial plumbing systems cannot be accommodated.
4. Toilet bowl must be regularly cleaned and winterized according to “Cleaning” and “Winterization and Storage” procedures or your warranty coverage may be voided.

Toilet Model Identification

The model identification label is located on the toilet base and will show the model number and serial number. For model 210 and 510H toilets, remove base cover to locate identification label (see page 8).

Operation

To prepare the Dometic toilet for use, check to be sure water supply to the toilet is connected. Turn on water supply and check system for leaks. Flush toilet and check for leaks.

To properly use the Dometic toilet, follow these simple instructions:

1. **To add water to the toilet**, lift or raise the flush pedal until desired water level is reached. Generally, more water is required only when flushing solids.
2. **To flush toilet**, push pedal all the way down until contents leave toilet bowl. Water flow pressures vary at different locations, therefore holding the flush pedal down for 4-8 seconds may be required. Minimum flow at the toilet of two gpm (7.6 lpm) is required for proper rim and bowl wash.
3. Release flush pedal by allowing it to snap back, which permits positive sealing around the flush ball.
4. A small amount of water should remain in bowl.

Note

Holding flush pedal down longer than necessary results in excessive water use.
Installation

1. To replace an older toilet, turn off water supply to toilet. Disconnect water line at toilet water valve. Unscrew floor bolt nuts and remove toilet. Discard old floor seal and mounting bolts. The old floor flange may be used if it is in good condition and fastener holes are positioned as shown in Figure A. Make sure center of floor flange is at least 11 inches from back wall (Figure A).

2. If installing new floor flange, make certain that the toilet mounting bolts align properly with Dometic toilet mounting pattern (Figure B).

3. Secure flange to floor using at least four flat-head screws (one each at the front, back, right and left sides of flange) through countersunk holes. Insert floor bolts into slotted holes at right and left sides of flange (Figure B).

4. Position floor seal by pressing the floor bolts up through holes in the seal.

5. Set toilet in place with bolts protruding up through mounting holes in base (Figure C).

6. Install washers and hex nuts provided with toilet. Snug nuts down equally with standard 7/16-inch open end wrench. Install two wood screws provided in two holes at rear of base. (Figure C).

7. If toilet is being installed in a shower stall, apply a 1/4-inch bead of glazing compound around the perimeter of the base (Figure D).

8. Connect water supply line to water valve (1/2 in. NPT) inlet using appropriate fittings or an extension (Figure E).

9. Turn on water supply and flush toilet to test for leaks.

10. Attach pedal cover to flush pedal (see instructions below) after making sure there are no leaks at connections.

11. FOR MODEL 210, put base cover in front of toilet base, aligning flush pedal with opening on side of cover. Push base cover against front of base, making sure it does not interfere with flush pedal operation (Figure F).

FOR MODEL 510H, attach base cover to toilet base in same manner for model 210, then fasten two sides together in back of base using elastic bands.

Attaching Pedal Cover

1. Align cover with pedal and press into place so that tab locks into space at rear of pedal.

2. To release cover, press on tab at back of pedal and pull off.
Winterization and Storage

When a Dometic toilet is stored for long periods of time or may be exposed to temperatures below freezing, the toilet must be winterized or stored according to one of the following procedures.

Caution
This toilet is not intended for use when exposed to temperatures below freezing.

Caution
Never use automotive-type antifreeze (ethylene glycol) in freshwater systems.

Note
Use nontoxic antifreeze (propylene glycol) designated for potable water systems. (See vehicle owner's manual.)

Storage options
Non-toxic Antifreeze Winterization (recommended method)
1. Pour antifreeze in potable water tank according to instructions from antifreeze manufacturer.
2. Flush toilet several times until antifreeze has flowed completely through toilet. For toilets with hand sprayer, the hand sprayer must be turned on to assure antifreeze is cycled through the sprayer. (continued on next page)
Drain Water from Toilet

1. Turn off water supply to toilet.
2. Remove water supply line from water valve.
3. Place a small container under water valve inlet to catch draining water.
4. Press flush pedal and allow water to completely drain from water valve and vacuum breaker.
5. Leave water line disconnected until threat of freezing temperature is past.

Note
Never leave vehicle or premises unoccupied for extended periods of time with municipal water supply or onboard water pump turned on when there is a possibility of freezing temperature.

Caution
Toilet warranty does not cover freeze damaged water valve that may result from improper winterization.

Deodorants and Special Tissue

Your Dometic toilet requires the regular addition of a deodorant product to reduce malodors and to help break down holding tank contents. Several factors should be considered in selecting a deodorant product.

Liquid or Granulated. Liquid products work more quickly by readily going into solution. Granulated powder formulations have the advantage of requiring less storage space and are less likely to leak if the package is inadvertently damaged.

How Much Deodorant and How to Add It. The deodorant is added directly into the toilet bowl, then flushed into the holding tank. Follow bottle or package instructions. Conditions of extremely warm weather, longer waste holding time and larger tank capacities may require more deodorant treatment. Also, to maintain optimum efficiency in odor control, the waste holding tank should be cleaned thoroughly at least once or more each season depending on use.

Why Not Use Household Toilet Paper in Your Toilet. Household tissues often contain adhesives which bond together the paper fibers from which the tissue is made. The adhesives prevent the tissue from breaking apart, and their use in “ultra-low flow” systems can cause system clogging. SeaLand tissue is especially designed for use in low water toilet systems. Its rapid dissolving properties minimize the amount of residual paper in the holding tank and allow deodorizers to work more efficiently.

SeaLand and Dometic Brands versus Other Brands. We constantly strive to provide our system owners with effective products that have minimal environmental impact and good value. Many deodorant products do not measure up to our standards of performance and value.

<td>---------------</td>
<td>---------------------</td>
</tr>
<tr>
<td>3. Flush ball will not close completely.</td>
<td>a. Too much friction between flush ball and ball seal.&lt;br&gt;b. Water valve screws are too tight.&lt;br&gt;c. Defective spring cartridge.</td>
<td>a. Lubricate between flush ball and seal with lubricant (e.g. silicone spray, furniture polish).&lt;br&gt;b. Loosen screws slightly.&lt;br&gt;c. Check spring tension by pushing flush lever down, then release it suddenly. If lever does not snap back to original position, replace spring cartridge.</td>
</tr>
<tr>
<td>4. Flush ball will not open.</td>
<td>a. Broken shaft.&lt;br&gt;b. Shaft not fully engaged in the spring cartridge.</td>
<td>a. Replace shaft.&lt;br&gt;b. Rotate flush ball slightly until shaft lines up with square in spring cartridge and is fully engaged.</td>
</tr>
<tr>
<td>7. Water does not enter toilet bowl properly.</td>
<td>a. Insufficient water flow rate at toilet.&lt;br&gt;b. Water valve clogged.&lt;br&gt;c. Plugged rim wash holes in toilet.</td>
<td>a. Check water flow rate at toilet. Rate should be 2 gpm (7.6 lpm) at toilet.&lt;br&gt;b. Remove and clean screen located on water valve.&lt;br&gt;c. Clean holes. If still a problem, replace toilet bowl.</td>
</tr>
<tr>
<td>8. Water is leaking from water valve.</td>
<td>a. Water valve body cracked due to freeze damage.&lt;br&gt;b. Water line connection is loose or not seated properly.&lt;br&gt;c. Defective water valve.&lt;br&gt;d. Stripped threads.</td>
<td>a. Replace water valve.&lt;br&gt;b. Insure that threads are not cross-threaded and tighten.&lt;br&gt;c. Replace water valve.&lt;br&gt;d. Replace water valve.</td>
</tr>
<tr>
<td>9. Water is leaking from bottom of toilet base.</td>
<td>a. Toilet is not secured to floor.&lt;br&gt;b. Worn or defective toilet mounting floor seal.&lt;br&gt;c. Cracked base.&lt;br&gt;d. Worn or defective floor flange.</td>
<td>a. Tighten toilet mounting bolts.&lt;br&gt;b. Replace floor seal between floor flange and toilet base.&lt;br&gt;c. Replace base assembly.&lt;br&gt;d. Replace floor flange.</td>
</tr>
<tr>
<td>10. Water is leaking from rear of toilet.</td>
<td>a. Loose vacuum breaker.&lt;br&gt;b. Damaged or defective vacuum breaker.&lt;br&gt;c. Cracked or defective toilet bowl.</td>
<td>a. Make sure vacuum breaker stem is pushed fully into sealing grommet in back of bowl.&lt;br&gt;b. Remove white cap from vacuum breaker. Flush toilet. If water leaks during flush, vacuum breaker needs to be replaced.&lt;br&gt;c. Replace toilet.</td>
</tr>
<tr>
<td>11. Water is leaking from the base/toilet connection.</td>
<td>a. Band clamp may be loose.&lt;br&gt;b. Ball/bowl seals may be worn or defective.</td>
<td>a. Remove plastic base cover (on applicable models) and tighten band clamp fastener.&lt;br&gt;b. Replace ball/bowl seals.</td>
</tr>

LIMITED WARRANTY

THE SELLER NAMED BELOW MAKES THE FOLLOWING WARRANTY WITH RESPECT TO DOMETIC GRAVITY-FLUSH MODELS 110, 210, 510H

1. TWO-YEAR LIMITED WARRANTY

1A. This Limited Warranty will be in effect for two years from the date of purchase.

1B. This Limited Warranty is made only to the First Purchaser (hereinafter called the “Original Purchaser”) who acquired the product for Original Purchaser’s personal, family, or household-type use. The Original Purchaser should retain a copy of the sales receipt or invoice as evidence of the date of purchase because proof of purchase is required to obtain warranty service.

1C. If this product is placed in commercial or business use, it will be warranted, to the Original Purchaser only, to be free of defects in material and workmanship for a period of 90 days from the date of purchase.

1D. This warranty covers all parts of the Dometic toilet which is warranted to be free of defects in material and workmanship under normal use. This warranty does not cover conditions unrelated to the material and workmanship of the product. Such unrelated conditions include, but are not limited to, (a) faulty installation and any damage resulting from such; (b) the need for normal maintenance and any damage resulting from failure to provide such maintenance; (c) failure to follow Seller’s instructions for use of this product, including failure which may result from not following winterization procedures; (d) any accident that results in damage to this product; (e) scratching or staining of any ceramic or plastic component; and (f) acts of God, or misuse of any part of this product and any alteration by anyone other than the Seller.

1E. For Original Purchaser (ONLY) to obtain the benefits of this Warranty during the 2-year period (for personal use) or 90-day period (for commercial use), the following shall apply:

(a) Original Purchaser shall contact the local dealer from whom the product was purchased; or contact the Seller Customer Service Department at 1-800-321-9886 (8 a.m.-5 p.m. ET, USA) and provide the local dealer or Seller Customer Service Department with sales receipt or invoice, product model and serial number from product. The product model identification label is located on the toilet base under the pedestal cover (see illustration).

(b) If product, while still under warranty, is returned to local dealer where purchased, the local dealer will repair, replace or refund the product per this Warranty and as authorized by the Seller. Seller will provide necessary replacement parts or product free of charge to Original Purchaser, including freight on such replacement parts or product, and Seller will pay direct labor charges for such repair or replacement.

(c) Under no circumstances will Seller pay or be liable for any of Original Purchaser’s or dealer’s travel charges or other expenses associated with bringing the product or recreation vehicle to the dealer for repair, for providing dealer with access to the product or vehicle, or for downtime of the product or vehicle.

(d) Original Purchaser may be required to return defective product or parts when requested by Seller; in such event, Seller will pay related freight costs.

2. THE SELLER DOES NOT AUTHORIZE ANY PERSON OR COMPANY TO CREATE OR EXTEND ANY WARRANTY OBLIGATIONS OR LIABILITY ON ITS BEHALF.

3. REPAIR OR REPLACEMENT OF, OR REFUND FOR, DEFECTIVE PRODUCT, AT SELLER’S OPTION, SHALL BE THE ORIGINAL PURCHASER’S SOLE REMEDY UNDER THIS LIMITED WARRANTY. IN NO EVENT SHALL SELLER BE LIABLE FOR PURCHASER’S INCIDENTAL OR CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATION OR EXCLUSION MAY NOT APPLY TO YOU.

4. SELLER DISCLAIMS ALL OTHER WARRANTIES WITH RESPECT TO THE PRODUCT, WHETHER EXPRESS OR IMPLIED, AND SPECIFICALLY DISCLAIMS THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. SOME STATES DO NOT ALLOW LIMITATIONS ON IMPLIED WARRANTIES OR HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

5. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY ALSO HAVE OTHER RIGHTS WHICH VARY FROM STATE TO STATE.
